

Liverworts TV

A few years ago, Polish television was at our exhibition of liverworts. By the way, the only recurring exhibition in Europe in its form with well over 500 different varieties. Everything was prepared. The NDR Schleswig-Holstein also came to visit us. We were surprised about so much interest and the customers liked it very much. So we could see on TV afterwards that the colleagues from Poland and Germany had filmed each other and also showed the Hepatica. So to speak, international understanding across borders through and with "liverworts".
